

The Temperature Checklist.

View the full article

<https://www.nvlogistics.com/cold-chain-shipping-active-passive-solutions-switzerland>

1

Does the product need to be frozen, refrigerated or at a controlled room temperature?

2

**What is the required temperature range?
Can the product be out of this range for any period of time?**

3

What temperature will the package be exposed to during transit, based on its final destination?

Example: is the product shipping from Switzerland to South East Asia where climates may be opposite at various times of the year?
